## B.a.a.S

*Bots Factory.*

Bots-as-a-service:  
Multiple *Bots and Chatbots*.  
Variable Price per *Bot*.

## Offer 4 – Bot Factory

To survive in a competitive, rapidly evolving industrial landscape, if you are to be profitable and competitive, you need to keep up with technological advances; dominate them before the competition. Robotics and automation are serious businesses, and now, it's time to act.

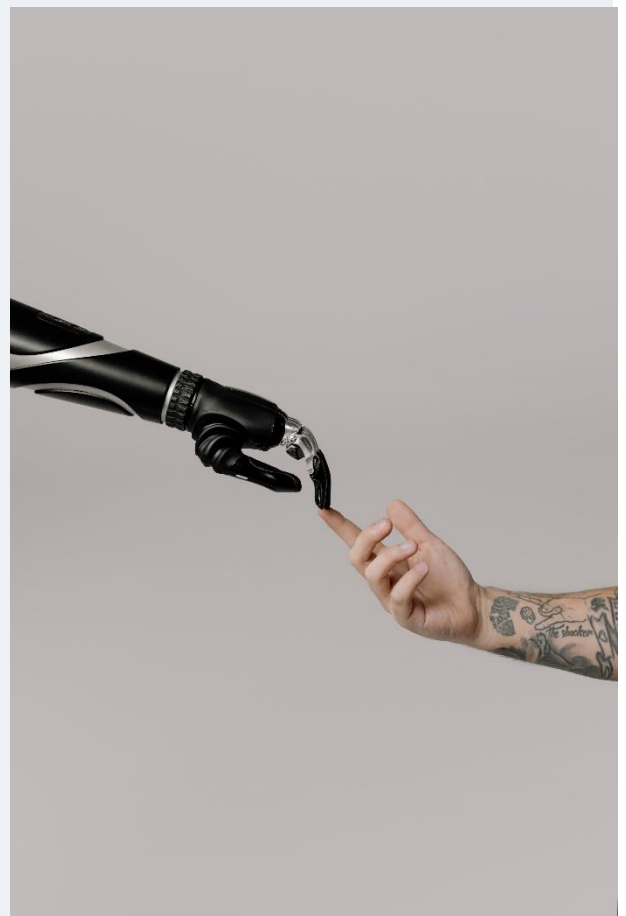

Automation helps unlock the insights that enclose the data you collect. With tools such as sentiment analysis and statistics, we have the ability to create operational reports, on which you can make more informed decisions.

The use of *bots* has many advantages, including:

- ✓ Faster than human.
- ✓ Time saving for customers.
- ✓ Available 24/7
- ✓ Customizable to improve the user experience.
- ✓ Help *lead generation*

Humans are still needed to manage *bots*, as well as to intervene if one misinterprets another human. That's what we are for, to help you in the process of digital transformation. We fold your robots as services.

and

# Work Smart

Among the advantages that are usually attributed to automation, are: increased production and productivity, more efficient use of resources, improvement of product quality, improvement of safety, reduction of working weeks of labor, reduction of delivery times, and energy saving. Increased production and increased productivity have been two of the main reasons to justify the use of automation.

# Not Hard.

Despite claims about the high quality of human labor, automated systems typically perform the manufacturing process with less variability than human workers, which translates into greater control and consistency of product quality. In addition, greater process control makes more efficient use of materials, which translates into less waste and a lower environmental footprint.

## Success Stories

Today's companies collect a lot of data. But they are not always easy to use. Often, a large part of them, is not used. Herein lies another advantage of automation. Our trajectory of more than three years automating processes worldwide, has shown us that we can all benefit from *low-cost technologies*. To learn more about our success stories contact us at:
