Offer – Website & Qr

This plan is designed for bars, restaurants, hospitality businesses and new brands, as well as for individuals who want to have their online foundations made and consulted with excellence and originality.

Reduce costs, increase productivity. After all, time is money, establish a direct line of communication with your customers, suppliers, employees and more. Expand your virtual presence and improve your image.

We digitize the components of your business:

- Schedules.
- Menus.
- Services.
- Location.
- About you.

We create a digital footprint, from your idea and adapt the necessary technology to reflect better position your business, with respect to the competition.

Increase the competitiveness of your business, eliminate the odious waiting times typical of most traditional business models.

Create more...

Design less.

Landing pages lead customers to a specific product, service or offer and encourage them to take action. This is your opportunity to create conversions and build your online presence.

We all live in a digital age where we need our virtual presence to reflect the values associated with your business. We capture your essence and digitize it. Designing a simple landing page that fits your name.

More and more work is being done to create more friendly environments with online customers. If you want to make them the center of your focus, digitalization can become your perfect ally.

Interconnectivity speeds up analysis and decision-making, enabling greater efficiency in different areas of work.

Examples

Expand the potential of contact with the Internet as a means to publicize your business and sell your products or services. In the same way, you will be able to establish links with other companies that do not necessarily have to be established in the same physical location as you:

- [Café Parks](#)
- [Bar Kaffi](#)
- [Restaurante El Olivo](#)
- [Peluquería Mogán](#)

“Good design is all about making other designers feel like idiots because that idea wasn't theirs.”

Frank Chimero
